

Project Manager – High Value Projects

Salary: Up to £60 p.a.

Other Benefits: Dearman standard (statutory pension + up to 15% bonus award quarterly)

Location: Croydon

Start: ASAP

The Company

Dearman is a global technology company delivering clean 'cold and power'.

Dearman's cutting-edge technology uniquely harnesses liquid air to deliver zero emissions power and cooling. The company is developing a portfolio of proprietary technologies, products and services, which deliver significant reductions in operating cost, fuel usage and emissions, at low capital cost. The first application of Dearman technology, to provide sustainable and efficient transport refrigeration, is currently undergoing trials.

The company is building an international reputation for innovation, rigour, commercial acumen and engineering excellence, all to fulfil its primary objective - to make the world a cleaner, cooler place.

Job Summary

Reporting to the responsible Dearman Director an experienced high value project manager is required to support the smooth running of Dearman's high value government funded projects (typical value >£4m). These projects involve collaboration with commercial and academic partners to deliver ambitious technical and commercial objectives in compressed time frames in the field of clean cold and power.

This role will involve focusing on the delivery of at least one high value project at a time with the objectives that:

- agreed deliverables are achieved to time and budget,
- resourcing requirements are understood and managed,
- partners are communicated with and managed effectively and
- the Board and senior leadership team are kept informed of project progress.

Experience of Prince2 or other systematic project management processes are essential.

Responsibilities

- Supporting senior leadership team through planning and project initiation phases
- Co-ordination of internal project teams and external parties to deliver outcomes in line with the project plan
- Effectively monitoring and reporting on progress and risks
- Financial reporting and control

- Fulfilling reporting requirements for both internal and external audiences
- Chairing project meetings, developing minutes and managing actions

Person Specification

- Degree level qualification in engineering (electrical, mechanical, automotive or aerospace)
- Significant experience of program management in an innovative engineering product environment, including field trials or early deployment, and progression from technical readiness to manufacturing readiness.

The following project specific skills are desirable:

- Management of £1m to £50m projects
 - Management of grant-funded projects, their governance and cost claim processes
 - Functional requirements documentation control
 - Proposing and planning of projects
 - Control of delivery timescales
 - Team building and management
 - Risk analysis and management
 - Presentation and communication skills
- While not essential, experience of the following may be of benefit:
 - Internal combustion, Rankine-cycle or other forms of heat engine
 - Cryogenic or high pressure industrial gases or fuels
 - Refrigeration or air conditioning
 - Prince2 or similar project management systems, ISO9001
 - Pre-revenue, start-up or innovation environments

Other Job Details

The job will be located primarily in Croydon, with regular travel to meetings with partners, customers and suppliers in the UK and overseas.

Working hours are 9am-6pm although as a new business there may be a requirement to work flexibly or additional hours as required. Paid leave is 25 days, plus English bank holidays.

Application deadline: 7th April 2017 (though applications will be consider first come first served)

Please note, we will take all relevant experience into account when considering your application. To apply for this position, please submit a CV and cover letter addressing how you meet the criteria set out in the person specification to careers@dearman.co.uk. We may appoint before the deadline.
